

SCIENCE FAIR

Science Fair rocks the hallways at the KGIBC-CTC campus in Vancouver, Canada.

The 20th KGIBC-CTC TESOL for Middle School Science Fair was held on January 26th, 2012. The campus came alive with the sounds of exploding balloons, hair raising electrical fun, awesome optical illusions, magical eggs and pepper, and lots of excitement followed by a chorus of "oohs and aahs". In other words, all sorts of scientific experiments, ranging from density to physics, kept the audience

The KGIBC-CTC Middle School students did a great job explaining and presenting their science fair experiments - they showed lots of energy and enthusiasm and really made it clear that teaching science can be FUN!. Great Job TESOL for Middle School!!!

Videos and student testimonials on the TESOL for Middle School Science Fair, can be found on our you tube channel: kgicvideos or on Facebook. - kgicgroup

KGIBC-CTC (www.kgibc.ca) TESOL for Middle School does a Science Fair as part of its curriculum. One purpose of the Science Fair is to provide the students with a 'real' audience before they head out for their one month practicum. Although a very daunting task indeed for the students, and most are very nervous (and very busy!) before the Science Fair, they come away from the experience very grateful, with increased confidence and self-esteem both as a teacher and as an L2 English speaker.

Pete Hall
